Global Supply's ability to access stock information, process orders and same-day ship is unsurpassed in the industry.

<i>Some of the wide variety of services offered to customers of Global Supply</i>	<b>Inventory Management</b>
	All inventory management systems, bin replenishment program, KAN-BAN, JIT, volume/blanket pricing, POU systems and in-house stores are fully computerized.
	<b>Value Added Services</b>
	As a full-service distributor, Global Supply supports kitting and packaging services, labeling, heat-treating, plating, part modification, tape and reeling for surface mount product and in-house mechanical assembly.
<i>We gladly accept</i>	<b>Standard and Non-Standard Specials</b>
 	Our knowledgeable staff welcomes the opportunity to quote on specials, made-to-print and modified standard product.

## Inventory Management Systems

<i>As a full service distributor, Global Supply is committed to a wide variety of customer specific inventory management systems.</i>	<b>Bin Replenishment</b>
	Tailored for each customers' specific inventory system needs, maximizing cost effectiveness and superior service levels. Inventory is delivered directly to the production floor by a Global Supply inventory management specialist. This program eliminates the need for incoming receiving, inspection and warehouse to production floor inventory transfers.
	<b>KAN-BAN</b>
	A min-max inventory system utilizing a bin system with minimum and maximum quantity controls for immediate inventory release to the production line. This system can be integrated with the POU system.
	<b>Volume/Blanket Pricing</b>
Annual and high-volume contract pricing, designed to minimize inventory cost and guarantee product availability.	
<b>POU Systems</b>	
An integrated inventory control system enabling inventory management from remote locations utilizing barcode technology, a PC with an integrated fax/modem, e-mail and EDI.
